### ACTIVITY 1

#### How Do Viruses React To Soap?

Have you ever wondered why we wash our hands with water and soap to get rid of bacteria and viruses? Good hand hygiene becomes especially important during viral outbreaks such as the COVID-19 pandemic! The CDC (Center for Disease Control) recommendations for hand washing say to scrub your hands for at least 20 seconds with water and soap. But how does soap kill viruses such as SARS-COV-2? In this activity, you will find out by experimenting with models of different virus types to see how they react to soap.

#### Materials Required

Aluminium foil, Double-sided tape that stays sticky when wet, Butter, Butter knife, Small plate, Sprinkles (the waxy elongated kind) or cracked pepper, Bowl, Warm water, Paper towel, Soap, spoon.

#### Virus Models

#### Instructions

1. Roll two balls of aluminium foil that have  $\frac{1}{2}$  inch diameter to make your virus models.
  2. Cover each of the balls with double sided tape.
  3. Roll one aluminium ball around in the sprinkles.
  4. Cover the second aluminium ball with butter evenly from all the sides and roll it around in the sprinkles.
  5. Carefully drop both the models into a bowl with soapy water and observe for 5 minutes.
  6. Record your observations and inference in science copy.
2. Make a comic strip on anyone of the following topics
- a) Harmful microorganisms.
  - b) Modern agricultural practices versus traditional agricultural practice.
3. Make a project (hand written in A4 size sheets) on an infectious disease of your choice.
