SCIENCE

1. June 5 is marked as WORLD ENVIRONMENT DAY, a day set aside since 1974 to promote "worldwide awareness and action for the protection of our environment".

Half of all plastic in the world today was produced in the last 15 years. Plastic pollution is a problem that the whole world is facing together. Plastic waste does not degrade at a sustainable rate. The more we continue to make, the more waste continues to build up. When plastic waste does not get disposed of properly it ends up in the environment which is causing devastating impacts. Keeping the hazardous impact of plastic, make a poster on "SAY NO TO PLASTIC". **MAIL IT OR WHATS APP TO SCIENCE TEACHER BY JUNE 4,2025**

2. Prepare hibiscus petal juice/turmeric paste to make a natural indicator at home. Classify the common household acidic and basic materials using the indicators prepared by you. Paste your photograph showing the change in the colour of the indicator of at least 1 material.
